TECHNOLOGIES OF LEARNING AS PART OF INNOVATIVE APPROACH

by
Maribel G. Esteron
Teacher III, Balon Elementary School

Millions of learners all over the world belong to the Net Generation. These learners use computers and other digital media for entertainment, learning, communicating and shopping. These learners prefer digital and interactive learning. This kind of learning implies the innovative procedure to discover new things through surfing. Some parts of innovative approach are discovery learning; student-oriented, materials are manipulated videotapes, slides presentation, or power point presentation, computer-aided instruction, and the Internet as well.

The following are some identifying characteristics of the innovative approach used in the technology of learning:
1. Discovery
2. Hypermedia Learning
3. Learner-Centered Loom
4. Immeasurable Learning Environment
5. Navigating to Learn
6. Learning is Fun

Learners are different today. They are alive and prefer to go for the interactive learning environment. All these ask teachers to keep abreast on the new concepts of handling them (learners), and consequently ask teachers to retool her teaching competencies to suit the current learning environment.
