TECHNOLOGY IN EDUCATION: ITS ADVANTAGES AND BENEFITS TO TEACHING-LEARNING

by:
Merly M. Sabado
T-II of Pagalanggang Elementary School

The modern classroom has taken several progress within the evolution of the training environment within the past 2.5 decades. Many of the benefits we have seen are due to the introduction of new technology options for students.

The development of the Internet since 1989 has been helping us to include more technological access to information in the modern classroom as well. Pupil gets to play interactive learning games, have a healthy competition with other pupils, and have their educational statistics tracked in real-time data to know where their point of focus should be.

New technology to students in a classroom setting can certainly help the educational environment, but also requires equal access for all students to ensure that everyone receives the same opportunities to succeed. That is why each school administration, teacher, and parents should periodically review the advantages of technology in education settings.

List of the Advantages of Technology in Education

1. Technology helps children to keep motivated during the learning process.

Technology lets students understand well they are doing compared to the average of all users and it gives them a chance to push harder for themselves and their education. Some programs encourage learning also issue rewards or award certificates, which help to make the lessons fun as well.
2. It inspires more communication between teachers and parents.

If there is technology in the classroom, there are more opportunities for parents and teachers to connect. The use of blogs in the classroom can help parents get to see what their children are learning each day. Applications and software options allow teachers to instantly report the behavior of the child to their parents to know in real-time what is happening throughout the day.

3. It creates new ways to learn for today's pupils.

Three censorious forms of perspicacity that we see in children today: emotional, creative, and instructional. The traditional classroom environment focuses more on the latter option. Do the same, standardized tests, and similar ranking tools. Technology allows pupils to embrace their curiosity in multiple ways. Pupils can try new things without embarrassment because their tech access gives them a level of anonymity.

4. Technology allows us to give pupils access to data from a single location.

Technology allows a pupil to access every item they need for a project from a central resource. Pupils spend all of the time searching for something specific or waiting for your library to order it, you can query on Google and find what you need.
