Mariveles, National High School- Camaya

Bump, look all around you, the teenager was everywhere they be in schools, markets, parks and anywhere. Many teenagers have their baby bumps while pursuing studies on their secondary level. A rampant case usually seen in high school.

At an early, teenagers gave birth. This can result to unhealthy pregnancy, premature labor and other health problem especially when they do not care about their prenatal check-up. Risk on the mother’s health is high because of early pregnancy. Some teenagers particularly those who are 18 and 19 have decided to have a baby because they think it is the perfect time because they were engaged in a stable and long term relationship. Some want to start family after reaching the age of 18. Some of the reasons of teenage pregnancy were contraception failure, unsafe sex, unprotected sex and engaging in sex when drunk. Among the reasons of teenage pregnancy were because of failure to have parents’ guidance. During the pregnancy, most of the girls were confused and afraid to continue the pregnancy. Some failed to continue their pregnancy because they were afraid of the responsibilities of being a mother. However, large percentage of teenage pregnancy were able to continue pregnancy and were able to give birth.

Experts conclude that family is the primary factor to prevent teenage pregnancy. Their guidance, love and protection are indeed significant to avoid pre-marital sex. However, teachers and school have also important roles in guiding teenagers to obviate teenager from engaging into pre-marital sex. Sex education is also indispensable to give knowledge and not to become innocent to this situation. Always remember that think before you do.
