THE ESSENCE OF EDUCATION

by:
Rubilyn M. Punzalan
Teacher II, Balon Elementary School

There are various connotations about education. It is the way to success, others believe that it is a matter of recognition; still others reveal that education is what makes a person worthy to be emulated by others; and still others signify that education is reaching one’s ambition in life.

Education is what makes a man- a man of dignity, respect, and accepting one’s fault, if it is what we acquire from the environment we are in, from the formal and informal schooling, and from the values we have learned from our ancestors, and mostly from the family where we came from. It is what we are- attitudes, actions, and word uttered by us. It is the way which points out what kind of person we are, having an education we have acquired yesterday, today and still tomorrow. It is the reality of being a person, externally and internally.

Education as a part of our life is education forever. We cannot cast it aside, for it is within us. We cannot put it in oblivion, because it is in our mind; nor can we kick it out, for it is not only in memory, but it is within our personality. And that education is what we are, who we are, and where we are in this world of commitment.

Therefore, whatever our answer is, always bear in mind that the most important thing in our life is to have Education in the real sense of it.
