THE IMPORTANCE OF GUIDANCE AND DISCIPLINE AMONG LEARNERS

by:
Elizabeth L. Rodriguez
Teacher III Samal North Elementary School SDO Samal Annex

The term guidance means molding a person to apply ethical values to become a better person. It helps a lot to direct the activities of a child towards worthy objectives. It is a principle of operation that makes education more meaningful to the individual, to his family and to the community as well. The term also implies influences and opportunities to assist the learner in knowing and understanding how he can make his life valuable and successful. Guidance is a fact that connotes … we need help from people to change our views and perspective in life.

Yes, all of us need to be guided in the right path and direction. We need, above all, divine guidance from the Lord for our spiritual needs. We also need guidance from our parents and elders to teach us so many things around us and to assist us in making the best choices. The school, as the second home of every child also plays a vital role in molding the pupils. The teacher and his day to day lessons will serve as mind-feeding to improve not only the skills of children but above all to make them worthy people. Classroom and school programs must be directed for the improvement of growth of each child.

The new era and our Pandemic experience brought a great challenge to all parents while they are staying together at home. It must be a precious time for parents to teach their kids at home not only academically but in terms of value-formation. It is high-time for families to be united and be guided by their parents and learn new things together.
All of us must have a sympathetic understanding of a CHILD… and must make conscious effort to guide and discipline them.
