THE IMPORTANCE OF PTA ORGANIZATION IN SCHOOL

by:
Maria Cecilia R. Cabrera
Teacher III, San Benito Elementary School

In every school nationwide, whether it is elementary or secondary, private or public there is always an organization that gives life to its existence. The PTCA, PTA or GPTA no matter what the acronym maybe the important thing is that it is led by a good leader—a leader who can plan, manage, direct and can command for progress.

General Parent Teacher Association is considered as the “soul of the school”. Without such members, the school itself would be helpless. School’s vision and mission of the institution becomes in reality only “if parents full support is present considering those will benefit are the school children”.

Shaping the learners through classroom instruction is not enough in uplifting the whole performance of the school. The social as well as the physical environment of the child must be considered to be improved in order to create a more conducive place for learning.

There is always a head to uplift the physical set-up of the school, to promote the interest of the child, to learn and to perform better in school. The inviting facilities, the classroom set-up and the cleanliness of the school ground affect the interest of the learner in the school.

All of these improvement can be achieved if an active GPTA is around.

Every school year, Brigada Eskwela is one of the programs set by the department wherein participation of the GPTA is really needed. In every school, where funds are lacking, the GPTA is the first source of the school. Most of the improvements done in
school are through the joint effort of the organization. In short, the GPTA facilitates the work in school.

In other words teachers and parents should be partners in attaining quality education. Thus, the GPTA, has a great role to perform for the improvement of the school and total development of the child.
