THE SIGNIFICANCE OF K TO 12 BASIC EDUCATION CURRICULUM IN THE PHILIPPINE EDUCATIONAL SYSTEM

by:

Valentina G. Buergo
Teacher II, Mariveles National High School – Poblacion

Filipinos are known to be competitive in the global community. While this may be true, our present education system hinders us in turning more viable among other countries. In view of this, the Department of Education or DepEd has been enhanced from the 10-year pf basic education into 12-year through the program called the K to 12 Education Plan in the country since the department started several years ago.

The execution of the K to 12 in the Philippines Basic Education Curriculum is the answer to our country’s evolution. However the government is now facing problems in implementing the program, there should be a need to employ it for the quality of the instruction that is very imperative and decisive.

One of his columns in a local newspaper, he pointed out that we should support the K to 12 Basic Education Program. Basically, students are able to acquire enough instructional time to do subject-related undertaking which become them more ready in various subjects. (Cruz, 2010)

Likewise, our graduates are well-trained to enter labor force. Our high school graduates are serviceable for they are proficient and well-furnished with the skills require in the workplaces. They can choose a field that they are interested in hence, they
are endowed with the skills needed without a college degree and added up to the nation’s manpower.

In such manner, our Filipino graduates are spontaneously acknowledge as professionals overseas for it comply with the international education standard as skillful by all nations. There is no need to spend money in order to qualify to their standards. Filipinos going abroad are able to help to their families more in our country by buying property and creating businesses.

In a nut shell, this is very beneficial to all of us on the long – terms of the K to 12. We must have the encouragement and support for the betterment of our educational system and for the growth of country’s economy. Let us remember that if we want to change our society, we must start in education. It is also an endeavor worth pursuing if we truly intend to improve the Philippine educational system. By investing more time and resources in our education, we can expect our graduates to become competitive in the global business arena and bring more success that would contribute towards building the nation.
