THE WRITER OF TOMORROW

by:
Mylinne S. Ronquillo
Teacher III, Jose. C. Payumo Jr. Memorial High School

Teachers play an important role in our society. We encourage our learners to reach their dreams, we inculcate lots of good and positive endeavours that would help them to reach their brightest future. Being a teacher is not just a profession to facilitate the learning process. We mold our students to become a good citizen and a better person of our nation.

Section 4. “Every teacher shall help, if duly authorized, to seek support from the school, but shall not make improper misinterpretations through personal advertisement and questionable means.”

THE ELECTION IS COMING!

As the run continuously for the leader of the nation, nobody thought that is not just the media who is the most influential weapon in promoting oneself but we teacher is on top of influencing the nation.

“Influence means supporting or opposing a candidate for nomination or election to public office or the recall of a public officer or supporting or opposing a ballot measure, question or proposition in a manner that is not impartial or neutral”, Definition of “influence” (NEW, 2013):

Yes, we are, we are the one who meets and greets a lot of people in every single day of our work. Having a little talk about our favoured politician can affect the decision making of our stakeholders and pupils who will be soon voters of the nation. Seeking for help on any politician is a lot easier because of our nature of work who influence a lot of people and it’s already known by the politician, and yes we are one of the favourite beneficiaries of the mindful leaders.
Yet, we as the unknown media because of how we can influence and set our learner’s mind has a big responsibility in FAIRNESS and being JUST. We cannot advertise anyone even if it is our relative because it’s against in our ethics. Even if it’s so easy to talk about our side in our room and in the midst of the class hour without knowing by anyone. We teacher should teach the RIGHT so no one will be LEFT behind in the path of confusion.

And YES, we can write the future of our LEARNERS to be the future LEADERS.

But is a big NO, to teach the LEARNERS to write the name of the opportunist LEADER.
