TLE TEACHERS: THE NEEDS TO ELEVATE PROVISIONS

by:
Walter M. Bantay
Teacher III, Balsik National High School

Much has been done and enjoyed by the teachers amidst the educational set up however, the TLE teachers had been asking and begging for some of the educational needs which must be identified. Like laboratory equipment, the materials needed to pursue with installation as well as some of the modular materials which are provided during the implementation of the K to 12 curriculum. However some of this maybe given by the department of education. However some of the needs of the teachers are still underserved. What must we do to minimize the stress and anxieties of the teachers with this perennial issues?

One may actually look at the bottle half empty or be pessimistic about the issues or one may actually look at the bottle half full or be optimistic about the issues.

Things to be done to help the department elevate the assistance and provisions for the TLE teachers:

1. Try to be the best TLE teachers you may become as to be outstanding in your field. When you become outstanding and best then you will have the voice to be heard from your department.

2. Be always open with new ideas and open for new avenues of learning and educational platforms especially during the online webinars.

3. Always equip yourself with the new knowledge of teaching and learning. Minimize stressing yourself with how you can be of the trend.
4. Try to just choose one or two educational platforms and memorize the applications for the future usage.

5. Assure yourself that you can be a winner even with the new normal.

To become positive and cautious with the educational set up and minimizing stress which one may not have may increase the teachers’ motivation even with less equipment and less materials in possession. May the TLE teachers proceed with quality learning and teaching even with the current status of the country. Let us see the silver linings.
