TRANSFORMING DISABILITIES INTO ABILITIES

by:

Ryann Ramos Singian, EdD
Master Teacher I, Dinalupihan Elementary School

Amidst the pandemic that confronts us these past few days, our desires to ensure that all kinds of learners will receive equal opportunity to learn should not be hampered. Our capacity to help must not be limited to the health, safety, protection, and economic stability of our fellowmen, more so, to assist our DepEd Family in providing the needs of differently-abled learners or Learners with Special Needs to improve their quality of life.

This New Normal prohibits the schools from Face to Face Learning, which greatly affects LSENs of Dinalupihan Elementary School. It would be very difficult for these children with special needs to sustain their development using distance learning modalities.

However, supplementary materials which are found to be appealing to their eyes will motivate them to learn and at the same time will improve and address their needs.

These prompted the LGU Dinalupihan to launch “Transforming Disabilities Into Abilities” an LGU Project for the LSENs of DES.

Assessing our readiness in terms of resources will guide us in planning and decision-making. To ensure the successful implementation of the chosen project, careful planning and interventions as a result of constant monitoring and evaluation should be considered. Choosing what is best for our constituents should not be our own choice but should be based on the context of our people and the municipality. It is not what we want, but must be the results of the assessment and careful judgment.
