TRENDS IN INSTRUCTIONS

by:
Ofelia G. Medina
Teacher II, Orani North Elementary School

As the world evolves, the trends in education also improve. Teachers are expected to be aware of these trends for them to deliver quality instructions in the educative process.

**Technology-inspired.** The kind of education that we have today requires technology. The teaching-learning process is inspired by technology. Various teaching-learning instructions are being realized with the aid of computers.

**Collaborative learning.** Another trending strategy to achieve success in instruction is through collaboration. The students learn to pool ideas together in order to come up with a great output. They brainstorm and share insights and formulate their ideas for the sake of a certain accomplishment.

**Internationally acclaimed practices.** The educational field not only considers localization but also the global perspective. Acquiring international trends, ideas and practices in teaching which are relevant are also considered.
Interactive teaching. The use of multi-media in teaching makes it interactive. The use of computers and other audio-visual materials is prevalent nowadays in every classroom where the teachers make the teaching-learning practices more fruitful, dynamic, meaningful and worthwhile.

Gender-sensitive instructions. Equality among genders is being implementing in the Philippine schools. In order to be fair to everyone, all genders should practice equal rights most especially in the attainment of education.

Innovative breakthrough. There are recent inventions and discoveries that are being recognized and implemented in the field of education. The power of internet and awesomeness of robotics led to the innovative breakthrough in education.

These are the latest trends in the field of education that teachers and students must have to enjoy. These are contributing to the evolution of education in the country.
