WORK ATTITUDES OF A GOOD TEACHER

by:

Divine S. Bañares
Teacher III, Legua Integrated School

The best things in teachers are their work attitudes. Teachers truly possess attitudes in work that are truly admirable and worth imitating. Colomeiscbi (2014) stressed out that teachers have an important impact upon their student's educational development and also the learning success of the students could be influenced by teachers’ attitudes.

The teachers’ work attitudes are actually expressed in various ways:

Openness to suggestions. Teachers always have an open mind and heart to entertain and consider suggestion most especially for the success of the teaching learning process for the benefit of the learners.

Respect for human dignity. It is highly expected from teachers that they should treat everyone equally and give due respect that one deserves. The learners love teachers because they are the ones giving them importance and good treatment.

Involvement in school community. A teacher plays a vital role in school as well as in the community. In school, he/she is truly much involved as the facilitator of learning while in the community, a teacher sincerely involves himself or herself as advocate leader for the good of humanity and of the environment as well.

Good interpersonal relations. As teacher exemplifies good character in the way he/she relates oneself to others. A teacher can deal with anybody, with different kinds of people.

Professional growth. A teacher never stops from learning. He/she continuously upgrades oneself professionally whether in taking up graduate courses or attending seminars, trainings, symposia and conferences.
Commitment to the school’s mission and vision. A teacher has a strong commitment to the school’s mission and vision. He/she translates the vision and mission through his words and actions. These are the standards which optimize the work attitudes of a teacher and these may greatly reflect his or her character and personality as an educator.
